

Skin Care From Head To Toe

WELCOME

Thank you for choosing Dermatology Associates of Atlanta, P.C. (DAA) for all of your skin care needs! At our core, we believe in the importance and power of providing skin care from head to toe. Our entire staff, including board-certified dermatologists, physician assistants, and the rest of our team is dedicated to delivering the most professional and personal level of care to every patient we treat.

Founded by Dr. Edmond Griffin (retired) in 1979 and later incorporated with business partner Dr. Scott Karempelis, DAA's providers have over 250 years of combined experience in their fields. In addition to Dr. Karempelis, our other partners include Dr. Joseph Payne and Dr. Ashley Curtis. Each provider has a different specialty, allowing for service directly tailored to each patient's unique skin.

We are a comprehensive dermatology practice, featuring eight specialty centers within one location, all dedicated to promoting healthy skin, hair, and nails. Our providers work closely with each center to ensure that each patient has access to the most helpful, safe, and effective treatment plan for their specific needs. Our providers are equipped with the knowledge, experience, and expertise to detect and treat any skin, hair, or nail condition.

SPECIALTY CENTERS

Dermatology

We pride ourselves on our ability to effectively diagnose and treat almost any dermatological condition that affects the skin, hair, and nails. This ranges from common conditions like acne and rosacea, to the removal of unwanted birthmarks, scars, age spots, and so much more. Our providers offer world-class knowledge in the treatment of skin cancer, including performing Mohs surgery.

Laser Institute of Georgia

One of the leading providers of cosmetic laser treatments in the Southeast, we boast an experienced team of board-certified providers devoted to helping patients address a wide variety of dermatological concerns. Our selection of over 15 laser treatments includes anti-aging therapies and advanced tattoo removal treatments, as well as solutions for acne, pigmentation issues, moles, spider veins, and scarring. We are active members of The American Society for Laser Medicine and Surgery (ASLMS).

Skin Medics™ Medical Spa

Our board-certified dermatologists, physician assistants, and experienced medical aestheticians offer a large selection of cosmetic dermatology services all under one roof. This includes facials, chemical peels, dermaplaning, microneedling, skin tightening, non-surgical fat reduction, and more. All of our treatments must meet a rigorous standard of safety and effectiveness for our patients.

Hair Removal Center

Our experienced hair removal providers use industry-leading laser hair removal and electrolysis technologies to help patients address unwanted body and facial hair. Our specialists have the ability to treat any skin type or tone. We take time to develop a collaborative hair removal treatment plan for each patient. Our hair removal treatments can address many areas including the chest, back, shoulders, underarms, abdomen, buttocks, bikini area, thighs, face, neck, cleavage, hands, toes, chin, and ear lobes.

SPECIALTY CENTERS

The Center for Non-Surgical Hair Loss

The Center for Non-Surgical Hair Loss focuses on providing hair restoration solutions for our patients. This includes fully understanding the progression of hair loss and how it can be slowed down and addressed. Our experienced providers specialize in helping our patients with a large selection of proven techniques, therapies, and prescription medications.

The Center for Women's Hair Loss

Our specialized Center for Women's Hair Loss has been an industry leader in providing unique non-surgical hair restoration techniques specifically tailored to female patients. Our experienced hair loss specialists have an in-depth understanding of the differences between male and female hair loss, including the underlying conditions that lead to premature hair loss or thinning. Our treatment techniques include the use of oral and custom compound topical prescription medications, laser therapies, scalp micropigmentation, and more.

Psoriasis Treatment Center

Despite its stubborn and frustrating nature, our state-of-the-art Psoriasis Treatment Center is able to provide outstanding options for treating psoriasis. While other psoriasis treatments are often expensive, ineffective, and difficult to apply, our board-certified providers specialize in finding real solutions that provide substantial and sometimes life-changing results.

Eczema Treatment Center

Eczema is a chronic skin condition that lingers beneath the surface until its symptoms are triggered. In addition to properly diagnosing the condition, the board-certified dermatologists and physician assistants at our Eczema Treatment Center specialize in identifying each patient's unique triggers and custom-tailoring treatment plans to help effectively manage their symptoms.

INSURANCE & FINANCING

Insurance companies may pay for non-cosmetic procedures when considered medically necessary. Because each insurance plan is different, we encourage you to read the details of your policy carefully as DAA cannot guarantee coverage and patients are responsible for the cost of treatment not covered by insurance.

For skin treatments and products that insurance does not cover, we offer patients financing options using CareCredit®. This national financing option provides patients with the choice of 6, 12, 18, and 24 month payment plans to meet your specific needs. DAA also accepts all major credit cards.

Contact Dermatology Associates of Atlanta's billing department at 404.256.4457 ext. 301 for further information about insurance coverage, payment and financing options.
